Artes cannot die.

(but thoſe
NOr court, nor ſhop-crafts were thine ARTES,
Which *Adam* ſtudied ere he did tranſgreſſe:
The Wonders of the Creatures, and to dreſſe
The worlds great Garden. Sure the Sun ne're roſe
Nor couch'd, but bluſh'd to ſee thy roofe encloſe
More dainties than his orb. CAN Death oppreſs
Such HONEST ART as this, or make it leſs?
No: Fame ſhall ſtill record it, and expoſe
Induſtrious care to all eternity. (DIE

Cannot hide Arts.

HEire of thy Fathers goods, and his good parts,
Which both preſerveſt, & augment'ſt his ſtore,
Tracing th' ingenuous ſteps he trod before:
Proceed as thou begin'ſt, and win thoſe hearts,
With gentle curt'ſie, which admir'd his Arts.
Whilſt thou conceal'ſt thine own, & do'ſt deplore
Thy want, compar'd with his, thou ſhew'ſt them (more.
Modeſty clouds not worth; but hate diverts,
And ſhames baſe envy, ARTS he CANNOT (HIDE
That has them. Light through every chink is ſpy'd.

Tradescant, J.

To the Ingenious
READER.

FOr ſome *reaſons* I apprehend my ſelf engaged to give an *account* of *two* things, that refer to the enſuing *piece* : The one, for not *publiſhing* this *Catalogue* untill now : The other, of the *mode* & *manner* thereof, being partly *Latine*, and partly *Engliſh*.

About three yeares agoe,

goe, (by the perſwaſion of ſome *friends*) I was reſolved to take a *Catalogue* of thoſe *Rarities* and *Curioſities* which my *Father* had ſceduloufly *collected*, and my *ſelfe* with continued diligence have *augmented*, & hitherto *preſerved* together: They then preſſed me with that Argument, *That the enumeration of theſe Rarities, (being more for variety than any one place known in* Europe *could afford) would be an*

an honour to our Nation, and a benefit to ſuch ingenious perſons as would become further enquirers into the various modes of Natures admirable workes, and the curious Imitators thereof: I readily yeilded to the *thing* ſo urged, and with the aſſiſtance of two worthy *friends* (well acquainted with my deſign,) we then began it, and many *examinations* of the *materialls* themſelves, & their *agreements* with ſeverall Au-

thors *compared*, a *Draught* was made, which they gave into my hands to examine over. Preſently thereupon my *onely Sonne dyed*, one of *my Friends* fell very *ſick* for about *a yeare*, and my *other Friend* by unhappy *Law-ſuits* much diſturbed. Upon theſe accidents that *firſt Draught* lay neglected in *my hands* another year. Afterwards my ſaid Friends call again upon me, and the deſigne of *Printing*, a-new *contri-*

ved,

ved, onely the prefixed *Pictures* were not ready, and I found my kinde friend Mr *Hollar* then engaged for about tenne Moneths, for whoſe hand to finiſh the *Plates*, I was neceſſarily conſtrained to ſtay untill this time.

Now for the *materialls* themſelves I reduce them unto two ſorts; one *Naturall*, of which ſome are more familiarly known & named amongſt us, as divers ſorts of Birds, foure-

footed Beaſts and Fiſhes, to whom I have given uſual *Engliſh* names. Others are leſſe familiar, and as yet unfitted with apt *Engliſh* termes, as the ſhell-Creatures, Inſects, Mineralls, Outlandiſh-Fruits, and the like, which are part of the *Materia Medica*; (Encroachers upon that faculty, may try how they can crack ſuch ſhels.) The other ſort is *Artificialls*, as Vtenſills, Houſeholdſtuſſe, Habits, Inſtru-

ments of VVarre uſed by ſeverall Nations, rare curioſities of Art,&c. Theſe are alſo expreſſed in *Engliſh*, (ſaving the Coynes, which would vary but little if Tranſlated) for the ready ſatisfying whomſoever may deſire a view thereof. The *Catalogue* of my *Garden* I have alſo added in the Concluſion (and given the names of the *Plants* both in *Latine* and *Engliſh*) that nothing may be wanting which at

ſent comes within view, and might bee expected from

Your ready friend

FINIS.

Modern deteriorated sheepskin binding removed. Book taken apart. Scotch tape removed. Paper deacidified (Barrow's magnesium bicarbonate formula), 22 leaves reinforced with silk tissue. Many inlays where paper missing. Collation of first signature was wrong when received (A4 was before A3) so a xerox of these leaves was sent to Yale Library & arranged in correct order. Book resewn with all-rag end papers, unbleached linen hinges, hand-sewed headbands. Rebound in full oasis morocco leather.
